wateron®

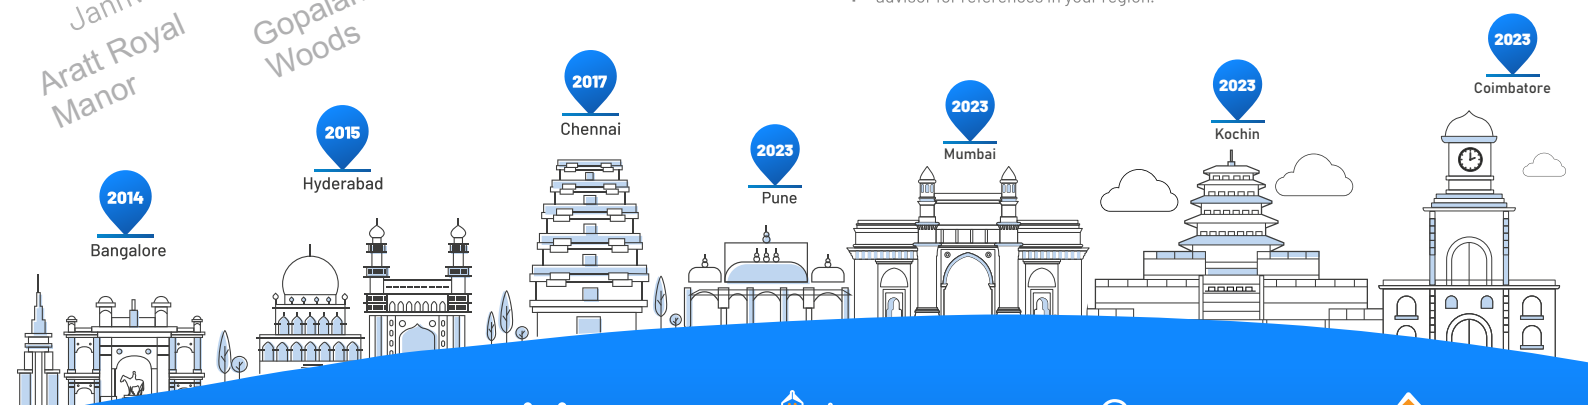

because saving water should be easy.

35% + Reduction in Consumption

12% Reduction in Energy Costs

100% Fairness in Billing

Partial list of customers. Please talk to your sales advisor for references in your region.

A drop saved today is a drop earned for tomorrow.

9 Years

7 Locations

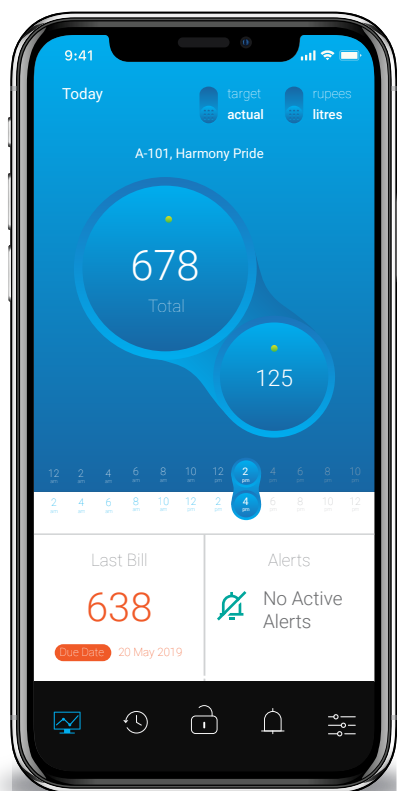

75+ Employees

30,000 Homes

We have done all the hard work so that **you don't have to.**

WaterOn® smart meters are installed at every inlet point. The advanced electronics records each consumption and send to the cloud software for billing and analysis. Moreover, installing WaterOn® is a simple cut & paste job - cut the pipe, paste the adaptors & fix the meter at every inlet. **100% automation in meter reading & billing to bring 100% fairness and satisfaction in your apartment.**

From just 8 digits to data that makes sense. **To you.**

Intelligence and insight on the screen that you love most - your smartphone. You can view per inlet consumption, historic view or averages. Moreover, you can control water supply from anywhere in the world, in case of a leak. **Your first step towards water conservation and a better world for your next generation.**

Comprehensive water management dashboard

Real-time water leakage alerts

Dependable remote operable ball valve

Daily health diagnostics of the complete system

Unique wired & wireless architecture

100% automation that works **for you.**

The advanced platform gives complete control over your billing process. A simple interface gives you the option to set tariff; and yes we have thought about slabs and fixed rates too. The dashboard gives the facility managers a complete snapshot of water supply (Supply side meters are required) & demand, all in real time.

The billing engine generates and sends the bills to residents automatically. Didn't we mention automation **brings peace of mind!**

High performance through **high quality materials.**

WaterOn® uses the world's most successful and reliable water meter from Honeywell - Elster as the metering unit. Honeywell's V110 offers unrivalled accuracy in any position, long service life, low maintenance and tamper proof features. Use of advanced engineering plastics for the measuring chamber minimises wear and maintains reliability under all operating conditions.

Compliance with **domestic and international standards.**

Available in sizes from 1/2 inch to 1 inch, the meters offer reliable performance in accordance with IS 4064 Class C standards. The meters are type tested and certified by FCRI, Palakkad, India.

Why SmarterHomes?

Metering as a Service

We not only pioneered sub-metering in India but also metering as a service to assure you of upfront cost and long term reliability. Now you can have a full scale metering system without significant capital spend. **No better way to show commitment.**

Expert project execution

Over the last 9 years, we have understood your needs. Our experienced and dedicated team of engineers, plumbers and customer success managers work together to put the customer delight first. **The idea of fairness is inherent in the team.**

Long term vision & commitment

Owned by Kathari Water Management, a dedicated water platform company promoted by India's largest climate fund. **We are in the business for long term as you want us to be.**

Proactive support system

We realise that things may go wrong sometimes. For all those times, we have a dedicated support team to help you. Our promise is to ensure that the system works as intended. In case you need help, we have a **dedicated Support Desk at 7777 80 4646* and online ticketing system**.**

* only between 8 am - 8 pm.
** available 24x7.

Join 1000s of happy **WaterOn®** users beating the water crisis by **conserving upto 35% water** in their homes and leave a better world for the next generation.
